

**Description**

Soluzione P is a single component, ready to use formula with a base of buffer acids. It is used in the building trade as a chemical treatment to eliminate cement mortar residues.

Uses

Soluzione P is used to eliminate cement mortar residues for both ceramic and terracotta floors and coverings, to chemically roughen industrial floors

finished with quartz powder in the case of successive coloured coverings with Kimicover 301 and to eliminate salt marks on brick walls for visible walls etc.

Application

Soluzione P must be applied either with a brush, roller or a single brush respecting a consumption of not less than 0.3 kg/m². Let the product work for 2-3 minutes then wash with abundant water. If significant amounts are present repeat the operation until all the residues have been eliminated.

Characteristics	Value
Appereance	Blue liquid
Specific weight	1,05 ± 0,05 Kg/l
pH	4 ± 0,5

Storage

Keep away from freezing temperatures; do not store at a temperature below + 5° C. In its sealed container the product maintains its stability for 24 months.

Warning

This product is intended for professional use. The development of vapors associated with the use of the Soluzione P is a function of the quantities of product used which, in turn, dependt on the extension, type and condition of maintenance of the treated surface and the type of organic/inorganic materials deposited on the substrate and the' final effect you want.

Ensure adequate air circulation to protect the health of applicators.

Avoid direct contact with metal and soft materials with acid.

The product should be handled with caution: use gloves, goggles and protective creams to prevent contact with skin and eyes.

The technical specifications and application methods recommended herein are based on our current knowledge and experience and do not represent any form of guarantee of the final results obtainable with the product. It is the customer's responsibility to check that this data sheet is still effective and has not been replaced with a more recent version, and that the product is suitable for the intended use.
